

Are you using sanitisers in your company?

Have the quantities increased during the Covid-19 pandemic?

Are you aware of the fire hazards of sanitisers containing ethanol?

Do you know your quantities and when special storage provisions apply?

Do not take any unnecessary liability risks! Our product range offers the perfect solution for you!

**Please contact us.
Our team is happy to help.**

The increase in hygiene provisions have led to a higher volume of sanitisers being stored. Most of them are ethanol-based and can be recognised by their Flame Symbol . This type of symbol indicates that the substance is flammable and requires special handling and storage. In the past, the quantities stored were relatively small and generally, not a cause for concern. Due to the Covid-19 pandemic large quantities are often stocked up and urgent action is required. Action should be taken to reduce the fire risk!

With fire-resistant safety storage cabinets from asecos you can safely store flammable hazardous substances. You can use the remaining storage space in the cabinet to provide personal protective equipment like gloves and masks.

Our product range for the storage of flammable sanitisers:

Model: Environmental cabinet E.195.095.F with Type 30 safety box

Equipment: body colour Gentian blue (RAL 5010), with wing doors in Purple red (RAL 3004), interior equipment with 2 x tray shelves and 1 x bottom collecting sump (galvanised sheet steel), safety box
