PRESEPT™

Hard Surface Disinfectant Products

DEPENDABLE. PRACTICAL. VERSATILE.

PRESEPT™

DEPENDABLE. PRACTICAL. VERSATILE.

PRESEPT™ takes hospital and hard surface disinfection beyond the confines of hypochlorites. A complete biocidal spectrum based on the unique action of NaDCC (troclosene sodium) ensures a highly effective disinfection, even in the presence of blood or other organic matter, providing protection against all organisms including MRSA¹, HIV, Hepatitis B and Herpes viruses. With long-term stability in storage, full biocidal activity is guaranteed right up to the moment of use. In every department, PRESEPT™ disinfectant products provide a dependable, practical and versatile solution to disinfection.

PRESEPT™ Disinfectant Granules

- Granules contain and solidify spillages, avoiding further contamination spread
- Formulation ensures a very high concentration of available chlorine, far surpassing that found with liquids
- Effervescent action ensures mixing of the disinfectant with the spillage, proving complete neutralisation of the hazard

PRESEPT™ Effervescent Disinfectant Tablets

- Better activity in the presence of organic matter than hypochlorite and may be used with confidence for all body fluid spillages
- Controlled concentration

- Stable and compact in storage ensuring full biocidal activity up to the moment of use.
- For use on plastic, porcelain, rubber, glass and steel
- Bactericidal against Gram-negative and Gram-positive bacteria, including Methicillin-resistant Staphylococcus

1. ATS LABS, 2007: EN 14561- Application of European Quantitative Carrier Test for the Evaluation of Bactericidal Activity
